Hertfordshire, near London

PROFILE

I help creative teams ship AI commercials and content faster, because I make them end to end, from script to final edit, in public every day. My MSc is in AI, so I also build the pipelines and tools behind the work.

Available from January 2027 for Junior AI Artist, AI Content Creator and Creative Technologist roles.

EXPERIENCE

Marvel D Creator, independent AI creative 2026 to now

- Make AI films, product campaigns and social ads from script to edit, and post the finished piece plus how it was made.
- **Not Alone**, a short AI horror comedy: over 41,000 views on Instagram.
- **Ballon d'Or**: a nine scene concept film with my own face held consistent across every scene, built from thirteen references and two character sheets.
- **Pillow Talk**: a six shot AI product campaign concept for Charlotte Tilbury, product locked to three references in every shot.
- Designed and built **58 live websites** for UK businesses and brand concepts with my own website build system: research, interactive scenes, build, phone and desktop testing, launch.
- **Christ Embassy Love Church Kent**: wrote the growth strategy, then built the website, online giving, automated emails, a 22 page admin desk and an AI assistant.

EDUCATION

MSc Artificial Intelligence and Robotics, University of Hertfordshire finishing January 2027

Modules include Team R&D Project, Artificial Life with Robotics, Responsible Technology.

PROOF

58
websites live

41,000+
views on one AI film

19,000+
followers on Instagram

TOOLS

Seedance · Kling · Higgsfield · Nano Banana · GPT Image · Claude · Premiere Pro · After Effects · Python · Next.js · three.js

STRENGTHS

- Character and product consistency across shots
- Short form craft: hooks, vertical, posting daily
- Briefs, approvals and deadlines
- Building tools: an AI guide and a Claude connector for my own site
